CanopyCo Profit-Share Report
Season start → May 31, 2026
Prepared June 19, 2026
BALLPARK — for review

⚠ **Read first — this is a ballpark.** Built from the supplied invoices, the COGS sheet (per-client totals), and payroll. Figures will move once the items flagged below are confirmed. All amounts are **pre-GST**. Owner (Kyle) hours are excluded from payroll. Employee payroll is allocated to clients in proportion to labour billed (we don't yet have per-client billable hours), so *per-client* labour profit is approximate; the *totals* are solid.

1. HEADLINE — CANOPYCO CLIENTS

Line	As supplied	Adj. (excl. $10k Ryan deposit)
Revenue billed (labour + materials, pre-GST)	$147,946.17	$147,946.17
Less: Cost of goods	$-45,157.75	$-35,157.75
Less: Employee payroll (excl. owner)	$-19,218.60	$-19,218.60
Total profit pool	**$83,569.82**	**$93,569.82**
Labour profit × 28%	$15,584.74	$15,584.74
Materials profit × 50%	$13,955.01	$18,955.01
➤ CanopyCo profit-share owed	**$29,539.75**	**$34,539.75**
McCahill net (after CanopyCo)	**$54,030.07**	**$59,030.07**

The two columns bracket the single biggest open question: a $10,000 "Ryan Expense Deposit" booked as a cost under Trudy. If that is not a true material cost, the right-hand column applies.

CanopyCo ballpark: $34,539.75 – $29,539.75

Labour profit = labour billed − allocated employee payroll. Materials profit = materials billed − COGS. CanopyCo share = 28% of labour profit + 50% of materials profit. Negative = client is currently underwater (usually a timing mismatch — see flags).

3. EXCLUSIVE CLIENTS (YOUR OWN — SHOWN FOR COMPLETENESS, NO SPLIT)

These are flagged exclusive in the invoice set (Christine, Ian & Judy, Anita, Muriel). No profit-share is applied; reproduced here only so the COGS sheet reconciles in full.

6. ITEMS TO CONFIRM (THESE MOVE THE NUMBER)

1. $10,000 "Ryan Expense Deposit" (Trudy COGS). Booked as a cost of goods but marked "SENT" to Ryan. If this is a profit-share advance / inter-company transfer rather than a job material cost, it should come out of COGS — that swings CanopyCo's share by $5,000.00 (the gap between the two headline columns).

2. $6,400 "blackbox electrical phase 1" (Trudy COGS) — UNPAID. Included as cost; it is a real subcontract bill but not yet paid. Kept in for now.

3. Trudy work-in-progress. Trudy has ~$39,500 in deposits received that are *not* in recognized revenue yet, while her costs are already booked. Her standalone line shows a large loss purely from this timing — it normalizes when the final invoices are issued.

4. "Dave Wallace" vs "Dave Green". COGS sheet says Dave Wallace; invoice #38 says Dave Green. Assumed same client.

5. "Stratta" mapping. Mapped to Oak Park VIS 5459 (a strata). Oak Park's invoices are labour-only, so this $894.68 mulch has no matching materials revenue and shows as a small loss. Confirm the correct client.

6. Payroll allocation. No per-client billable-hours yet, so total employee payroll is spread across clients by labour-billed share. Company totals are correct; per-client labour profit is indicative only.

7. June-dated COGS. A few mulch/plant buys are dated June 5 (just past the May 31 cutoff) but tie to season jobs, so they're included.
